

Juan David Romero Sánchez

Web Developer

Bogotá, Colombia | [linkedin.com/in/Juan-Romero](https://www.linkedin.com/in/Juan-Romero) | +57 3212714034 | mateoromero0910@gmail.com | [Portfolio](#)

I am a Software Developer with three years of experience working in companies. During this time, I have participated in the creation, improvement, and maintenance of digital platforms for different sectors. I have experience building applications and services that help automate processes, improve user experience, and optimize system performance. I have worked with various programming languages such as Java, Ruby, PHP, and JavaScript. I stand out for being a committed, proactive, problem-solving person who easily adapts to different teams and work environments. I am currently continuing to strengthen my skills to design more efficient, secure, and maintainable solutions.

AREAS OF EXPERIENCE

- Backend Development
- API Integration
- Frontend Development
- Systems Scalability
- Database Design
- Performance Optimization
- Cloud Services (AWS)
- Containers and Orchestrators

EXPERIENCE PROFESSIONAL

Fusepong

Developer FullStack

Bogotá, Colombia

September 2024 – Present

- Refactoring and optimization of existing backend processes to improve performance, reduce complexity, and facilitate maintenance.
- Developing new features from scratch, prioritizing scalability, code organization, and ease of future maintenance.
- Technical decision-making in the modification of existing processes, evaluating each change to maintain system consistency and long-term quality.
- Provided guidance and support to other developers on the team, addressing questions and promoting best practices to ensure technical consistency in the backend.
- Consistent application of design patterns and clean development principles, aimed at delivering robust and well-structured solutions.

Montechelo Technology

Developer Backend

Bogotá, Colombia

January 2024 – July 2024

- I led the development of key backend features, achieving a 30% improvement in system performance by optimizing critical processes.
- I proposed and designed microservices-based architectures geared toward system scalability and maintainability in the medium and long term.
- I designed, evaluated, and implemented microservices-based architectures for future iterations, proposing scalable and adaptable long-term solutions.
- I coordinated closely with interdisciplinary teams, ensuring cohesion, efficiency, and achievement of development objectives for each project.
- I managed workflows with tools such as Git and GitHub, ensuring version control, traceability, and effective collaboration between developers.

Factory of Software - CDM

Developer Backend

Bogotá, Colombia

January 2023 – December 2023

- I led the analysis, design, and development of a complete information system, working on both the backend and frontend to deliver a comprehensive solution.
- I developed and optimized key modules such as the landing page, login, apprentice and company management, appointment scheduling, and reporting, improving the system's overall functionality and efficiency.
- I was instrumental in leading the system implementation and end-user training, ensuring a smooth transition and optimal use of the new system.
- I built robust and scalable solutions focused on ensuring high performance, availability, and ease of maintenance.
- I implemented new features and optimized system performance, resulting in a 40% improvement in operational efficiency.
- I coordinated the system implementation and end-user training, facilitating a smooth and effective adoption of the new platform.

EDUCATION

Manuela Beltrán University (UMB)

Software Engineer

Bogotá, Colombia

January 2025 - At the moment

Service National of Learning (SIGN)

Career technological

Analysis and development software

Bogotá, Colombia

April 2022 - July 2024

Service National of Learning (SIGN)

Technical Career in

Software

Development

Bogotá, Colombia

January 2020 - Dec 2021

SKILLS ADDITIONAL

- **Languages:** Native Spanish | English A2 (level A2, improving).
- **Skills:** Resilience | Communication | Continuous Learning.
- **Programming Languages:** PHP | JavaScript | Java | Python.
- **Databases:** MySQL | PostgreSQL | MongoDB
- **Frameworks and Tools:** Laravel | Spring Boot | Angular | Docker | AWS | Kubernetes | Git and GitHub.
- **Certifications:** SCRUM | Laravel | PHP | SQL | SOLID | PHP OOP | Git and GitHub | JavaScript | Python | Introduction to Java | Java | Spring Boot | Angular | MySQL | NoSQL
