

Juan David Romero Sánchez

Web Developer

Bogotá, Colombia | [linkedin.com/in/Juan-Romero](https://www.linkedin.com/in/Juan-Romero) | +57 3212714034 | mateoromero0910@gmail.com | [Portfolio](#)

Backend software developer with over two years of experience as a freelancer and two years of certification in creating and maintaining robust and scalable applications. Skilled in implementing APIs and web services using Java, Ruby, PHP, and JavaScript, with a focus on performance and security optimization. Proactive, with a strong ability to solve complex problems and work in teams to achieve innovative solutions.

AREAS OF EXPERIENCE

- Backend Development
- API Integration
- Frontend Development
- Systems Scalability
- Database Design
- Performance Optimization
- Cloud Services (AWS)
- Containers and Orchestrators

EXPERIENCE PROFESSIONAL

Fusepong

Developer FullStack

Bogotá, Colombia

September 2024 – Present

- Development of applications and microservices focused on process optimization and system performance improvement, applying modern software engineering practices.
- Advanced test automation to ensure quality at all stages of the development cycle, with a focus on continuous validation using the **Test- Driven methodology. Development (TDD)**.
- Implementation of comprehensive monitoring and notification solutions, integrating messaging and alert systems for proactive incident management.
- Significant experience developing critical features and adapting automated testing to ensure software functionality and reliability.
- Constant commitment to continuous improvement, balancing best practices in development and testing to maximize the efficiency and quality of the final product.

Montechelo Technology

Developer Backend

Bogotá, Colombia

January 2024 – July 2024

- I led the implementation of critical backend functionalities, achieving a 30% performance increase, optimizing key processes, and improving overall application efficiency.
- Led frontend development using Angular, resulting in a 25% improvement in usability and user experience.
- I designed, evaluated, and implemented microservices-based architectures for future iterations, proposing scalable and adaptable long-term solutions.
- I coordinated closely with interdisciplinary teams, ensuring cohesion, efficiency, and achievement of development objectives for each project.
- I implemented tools such as Git and GitHub for version control and team collaboration, ensuring organized, consistent development aligned with industry best practices.

Factory of Software - CDM

Bogotá, Colombia

Developer Backend

January 2023 – December 2023

- I led the analysis, design, and development of a comprehensive information system, covering both the frontend and backend, ensuring a comprehensive and coherent solution.
- I spearheaded the creation and optimization of key modules, such as the landing page, login , apprentice management, company management, appointment scheduling, and reporting, significantly improving the system's functionality and efficiency.
- I was instrumental in leading the system implementation and end-user training, ensuring a smooth transition and optimal use of the new system.
- I developed robust and scalable solutions, ensuring high availability and superior system performance.
- I used Git and GitHub for version control and collaboration, facilitating an agile and well-organized workflow.
- I implemented new features and optimized system performance, resulting in a 40% improvement in operational efficiency.
